SAFETY FEATURES

35 IN STABILISING STROKE

A 35 in stabilising stroke lets the outriggers compensate for highly uneven terrain, so the machine sets up level on broken and sloping ground.

AUTOMATED POSITIONING SYSTEM

Boom movements are stored and repeated automatically, removing guesswork when returning to the same working position through a shift.

SAFETY PLATES

Safety plates are supplied as standard to spread outrigger point loading and protect paved, sensitive and made-up surfaces.
